### **More information about Dr. Daggett:**

Bill Daggett, Ed.D., is the founder and chairman of the International Center for Leadership in Education (ICLE). He is recognized worldwide for his proven ability to move preK-12 education systems towards more rigorous and relevant skills and knowledge for all students. He has assisted states and school districts with their school improvement initiatives. Dr. Daggett has also collaborated with education ministries in several countries and with the Council of Chief State School Officers, the Bill & Melinda Gates Foundation, the National Governors Association, and many other national organizations. He serves on several advisory boards, including the NASA Education Advisory Board and the USA Today Education Advisory Board.

Before founding the ICLE in 1991, Dr. Daggett was a teacher and administrator at the secondary and post-secondary levels and a director with the New York State Education Department, where he spearheaded restructuring initiatives to focus the state's education system on the skills and knowledge students need in a technological, information-based society.

Dr. Daggett is the creator of the Application Model and Rigor/Relevance Framework™, a practical planning and instructional tool for determining the relevance of curriculum and assessment to real-world situations. Dr. Daggett's Rigor/Relevance Framework has become a cornerstone of many school reform efforts throughout the United States. He is the author of numerous books about learning and education, textbooks and research studies, reports, and journal articles.

Dr. Daggett has a special commitment to individuals with disabilities. He and his wife, Bonnie, volunteer their time and lend their support to Wildwood Programs in upstate New York. Wildwood serves the needs of people of all ages who, like their daughter Audrey, have neurological impairments/learning disabilities or autism, by enabling them to become the best that they can be.
